

Lapya — Figma Make AI Prompts (Blueberry Edition v2)

Use case: Build a clickable Lapya prototype in Figma Make AI for your Technovation demo, beta testers, and pitch video.

Brand direction: Blueberry-led palette — deep navy + cobalt blue, accented with warm marigold yellow. Inspired by the blueberry: the world's most nutrient-dense fruit.

Design intent: So beautiful that someone with no chronic condition still wants to use it.

How to use: Start with Prompt 0 (Master Setup). Then run prompts in order — each one builds on the previous screen. Tweak any text inside [brackets] to match your real brand decisions.

Tip: After each generated screen, ask Figma Make: *"Show me 2 alternative layouts for this screen"* — pick the best, then move on.

⚙️ Prompt 0 — MASTER SETUP (run this FIRST, once)

You are a world-class UI/UX designer building a mobile-first prototype called "Lapya" — an AI-powered therapeutic diet platform for Africans living with multiple chronic diseases (diabetes, hypertension, kidney disease, cardiovascular disease, obesity, uric acid, high cholesterol). The user is a Nigerian woman aged 30-65, often a caregiver buying for her parent.

Our design mantra: "So beautiful that even someone without a chronic condition still wants to use it." Premium feel. Editorial polish. Calm confidence.

BRAND

- App name: Lapya (means "health/well-being" in Marghi, a Nigerian language)
- Tagline: "Eat well, even with everything."
- Personality: warm, premium, trustworthy, modern, African, clinical but never cold. Think "a knowledgeable Nigerian aunty crossed with a quietly luxurious wellness brand."
- Inspiration: blueberries are the world's most nutrient-dense fruit. We lean into that visual identity — deep berry blues with sun-warmed marigold accents, the way a bowl of blueberries and mango looks together.

LOGO BRIEF (generate 3 variants and let me pick one):

Create a playful, modern app logo that combines:

- A stylized blueberry shape (round, slightly heart-like, with a tiny crown of leaves on top)
- The letters "L" and "P" cleverly hidden inside the form — for example, the L could be the stem/leaf and the P could be the rounded berry body, OR the two letters could interlock to form the berry silhouette
- A small playful highlight dot on the berry for a friendly, fresh feel

Style: rounded, geometric, friendly, modern wellness-brand quality.

Colors: deep blueberry navy as primary fill, with a tiny marigold leaf accent. Must work at 32px (favicon) and 512px (app icon). Provide on light and dark backgrounds.

If the LP-in-blueberry concept is too complex for one mark, default to a clean rounded blueberry silhouette with a Sora-700 "Lapya" wordmark beside it.

COLOR PALETTE — use these EXACT hex codes everywhere

CORE BRAND (drawn from the blueberry + mango mood board)

- Blueberry Navy (hero, headers, deep surfaces): #1E2A5E
- Blueberry Cobalt (primary buttons, active states): #3D6BE5
- Periwinkle (secondary surfaces, soft tints): #A8BCF0
- Marigold (accent, highlights, CTAs): #E8A92E
- Butter Yellow (soft accent, badges, hovers): #F4D27A

NEUTRALS

- Background warm white: #FBFAF7
- Surface white (cards): #FFFFFF
- Text primary (on light): #1A2244
- Text secondary: #5E6680
- Text on dark navy: #F4F1EA
- Border / divider: #E7E4DD

STATE COLORS — keep these VERY SUBTLE. They should support, never compete with, the brand blues and yellow. Always use the muted versions below, not saturated traffic-light colors.

- Success (subtle sage): #6E9A6E
- Warning (subtle amber): #C9892E
- Danger (subtle clay red): #B4533A
- For traffic-light meal indicators, use small dot icons (not large color blocks) so the brand palette stays dominant.

USAGE RULES

- Blueberry Navy = headers, top bars, deep emotional moments, dark mode surfaces, hero sections.
- Blueberry Cobalt = primary buttons, links, active tabs, selection states.
- Periwinkle = backgrounds for selected cards, light tints, illustration fills.
- Marigold = ONE accent per screen — used for the most important micro-moment (streak counter, "RECOMMENDED" badge, a single highlight). Never a wall of yellow.
- White and warm white dominate the canvas (60% of any screen). Blues are 30%. Marigold is 10%. State colors are <5%.

TYPOGRAPHY

- Display headings (H1, hero): "Fraunces" 600 — editorial serif, gives premium wellness-magazine feel
- Headings (H2-H4) and brand wordmark: "Sora" 700
- Body and UI: "Inter" 400 / 500
- Numbers and data: "Inter" 600 with tabular figures
- Base sizes: 16px body, 14px caption, 20px H4, 24px H3, 32px H2, 40px H1

SPACING, RADIUS, ELEVATION

- Spacing grid: 8px base (4, 8, 16, 24, 32, 48, 64)
- Radius: 20px on cards, 14px on buttons, 28px on bottom sheets, 999px on pills
- Shadow: very soft, blueberry-tinted, never grey
(0 4px 16px rgba(30, 42, 94, 0.08))

COMPONENT STYLE

- Primary button: Blueberry Cobalt (#3D6BE5) bg, white text, 56px tall, full-width on mobile, 14px radius. Subtle hover lift.
- Secondary button: white bg, Blueberry Cobalt border 1.5px, cobalt text.
- Marigold accent button: Marigold (#E8A92E) bg, Navy (#1E2A5E) text — use rarely, only for hero CTA moments like "Upgrade".
- Cards: surface white, 20px radius, 20px padding, navy-tinted shadow.
- Selected/active card: Periwinkle (#A8BCF0) tint background, Cobalt border.
- Top bar: warm white bg OR Navy bg for hero pages.
- Bottom nav: white bg, 4 icons (Home, Plan, Caregivers, Profile) + a raised

center Scan button in Blueberry Cobalt with a small marigold ring.

- Inputs: white bg, border #E7E4DD, focus → cobalt border 2px with a soft periwinkle glow.

IMAGERY — VERY IMPORTANT, READ TWICE

EVERY image in this prototype must be HIGH QUALITY. Zero blur, zero pixel artifacts, zero generic stock-photo feel.

Requirements for ALL images:

- Minimum render resolution: 2x device pixel ratio (use @2x or @3x assets)
- Minimum source resolution: 1500px on the longest edge for hero shots, 800px for food cards
- Professional food photography style: natural overhead lighting, shallow depth of field where appropriate, clean styling, real plates and real African ceramics, no over-filtered Instagram look
- Pull from premium sources: Unsplash, Pexels, Adobe Stock, or commissioned photography. If using Unsplash placeholders, specify "high resolution food photography of [dish], professional lighting, top-down"
- People photography: real Nigerian/West African women aged 30-65, warm natural light, candid not posed, hijab-friendly representation, dignified

Subject matter to use:

- Real Nigerian/West African food: jollof rice, egusi soup, eba & soup, pounded yam, plantain, akara, suya, moin moin, beans porridge, ofada rice, efo riro, ogbono, tuwo shinkafa
- A subtle blueberry motif appears in marketing surfaces (landing page, welcome screen, paywall) — never overpowering, but consistent visual echo of the brand.

NEVER use:

- Generic Western salad/quinoa/avocado-toast imagery
- Stock photos that look stock
- AI-generated food images that look uncanny (six-fingered hands, melted textures, fake-looking food)
- Low-resolution thumbnails stretched up
- Heavy filters or oversaturated photos

When the prototype displays food, use these exact unsplash search terms or equivalents:

"jollof rice plate top down", "nigerian egusi soup with pounded yam",
"plantain frying pan african kitchen", "fresh blueberries bowl light wood",

"mango cubes blueberries overhead"

VOICE & MICROCOPY

- Warm, plain English, sprinkle Nigerian English naturally and respectfully
 - Use local food measures: "1 cigar cup", "1 mudu", "1 derica", "hand-fistful"
 - Examples: "Your plan for today, Mama." / "Tap to swap this meal."
 - Empty states: "Nothing here yet — let's set you up."
-
-

ACCESSIBILITY

- All text minimum 14px, body 16px
- Minimum 44x44px tap targets
- WCAG AA contrast (palette above has been chosen for this — Navy on warm white = 12:1; Cobalt on white = 5.2:1)
- Large, simple icons (Phosphor Duotone or Lucide style)

DEVICE FRAME: iPhone 14 Pro (390 × 844) for all screens. Build everything mobile-first. We will derive a tablet/desktop version later.

PLATFORM: Progressive Web App look (no iOS-specific chrome).

Confirm you understand the design system. Generate 3 logo variants now (see logo brief above), then wait for me to ask for the first screen.

Prompt 1 — Splash + Welcome screen

Generate the LAUNCH SPLASH and WELCOME screen for Lapya. Use the Lapya design system from Prompt 0.

SPLASH (1 screen, 2-second auto-advance):

- Full-screen Blueberry Navy (#1E2A5E) background
- Centered Lapya logo (the blueberry-with-LP mark) at 96px
- Wordmark "Lapya" below in Sora 700, 40px, in Butter Yellow (#F4D27A)
- Tagline below in Inter 500, 16px, Periwinkle (#A8BCF0)
- Subtle scattered blueberry illustration as low-opacity background texture
- Soft fade-in animation noted in the prototype interaction

WELCOME screen (1 screen, first time users):

- Warm white background (#FBFAF7)
- Top 60%: HIGH-RESOLUTION editorial photograph of a Nigerian woman (50s) and her daughter (28) sharing food at a wooden table — golden hour lighting, dignified candid moment, food visible (jollof rice, plantain). Image must be 1500px+ source, professional quality.
- Photo has a soft Blueberry Navy overlay gradient at the bottom for text legibility
- Display headline in Fraunces 600, 40px, Navy: "Eat well, even with everything."
- Sub-text in Inter 400, 16px, text-secondary: "Personal meal plans for diabetes, blood pressure, kidney health and more — in the African foods you actually love."
- Primary button (Blueberry Cobalt): "Get started" (full width)
- Secondary text link below: "I already have an account" in cobalt
- Bottom microcopy in 12px secondary: "By continuing you agree to our Terms & Privacy."

Provide both screens side by side. Both must use only images that pass the high-quality test in Prompt 0.

Prompt 2 — Onboarding flow (4 screens)

Build a 4-screen ONBOARDING WIZARD using the Lapyra design system. Top of every screen has a progress dots indicator (4 dots, current step filled Blueberry Cobalt). Each screen has "Back" top-left and "Next" bottom button (Blueberry Cobalt primary).

SCREEN 1 — "Who are you?"

- Background warm white
- Heading Fraunces 600, 32px: "What should we call you?"
- Single text input: "Your name" placeholder "e.g. Bola"
- Subhead Sora 700, 20px: "And who is Lapyra for?"
- Below: 3 selectable cards in a vertical list — each card has an icon (Phosphor duotone), a label, and a 1-line description:
 -  "I'm managing my own health" (Patient)
 -  "I'm caring for someone I love" (Caregiver)
 -  "I'm a registered dietitian" (Dietitian)
- Selected card: Periwinkle background tint + Cobalt border 1.5px

SCREEN 2 — "Your conditions" (only if Patient or Caregiver)

- Heading: "What are you (or they) living with?"
- Subtext: "Select all that apply. You can change this anytime."
- 5 large multi-select chip cards in a 2-column grid, each with a duotone icon in Navy:
 - Type 2 Diabetes
 - High Blood Pressure
 - Kidney Disease
 - Heart Disease
 - Weight Management
- Selected chip: Periwinkle tint + Cobalt border, small Marigold check icon top-right
- Below each selected condition, a small severity dropdown appears: Mild / Moderate / Severe
- Tiny disclaimer in 12px text-secondary: "Lapya is not a replacement for your doctor."

SCREEN 3 — "Your food world"

- Heading: "What's on your table most days?"
- Subtext: "We use this to make plans that feel like home."
- 3-column grid of toggle-able food photo chips, each a HIGH-RESOLUTION square image (300px min) with the dish name beneath:
Jollof Rice, Eba & Soup, Pounded Yam, Beans, Rice & Stew, Plantain, Indomie, Suya, Bread & Tea, Pap & Akara, Tuwo, Yam Porridge
- Selected chip: cobalt 2px border + tiny marigold check
- Below grid: "Any food allergies?" — comma-separated text input

SCREEN 4 — "All set"

- Centered illustration: animated blueberry mark with a soft pulse glow in Periwinkle
- Heading Fraunces 600, 32px, Navy: "We're building your plan, [Name]..."
- Subtext: "This takes about 5 seconds. We're balancing [their conditions] using foods you love."
- Animated loader bar in Cobalt with subtle Marigold shimmer
- Auto-advances to Home screen

Show all 4 screens in a single artboard, side by side, with arrows indicating the flow. ALL food imagery must be high-resolution professional photography.

Prompt 3 — Home screen (Patient view)

Build the HOME SCREEN for a logged-in patient (Mama Nkechi, has diabetes + hypertension). Lapy design system from Prompt 0.

LAYOUT (top to bottom):

1. Top bar: Lapy logo small (left), notification bell + circular profile avatar (right). Background: warm white.
2. Greeting hero card with Blueberry Navy (#1E2A5E) background, 24px radius, 24px padding:
 - "Good morning, Mama" in Fraunces 600, 24px, Butter Yellow
 - "Day 4 of your plan — keep going." in Inter 400, 14px, Periwinkle
 - Small streak chip top-right: "🔥 4-day streak" in Marigold pill on Navy
3. Section header row: "Today's meals" (Sora 700, 20px, Navy) + "See full week →" link right-aligned in Cobalt
4. Three meal cards in a horizontal scroll, each card:
 - HIGH-RESOLUTION food photo (4:3 ratio, top-down editorial style), 20px radius
 - Meal type label in 12px uppercase Cobalt above name
 - Dish name in Sora 700, 18px, Navy
 - Two small condition-safety dots inline (sage = safe, amber = caution, clay = avoid) followed by "Safe for diabetes & BP"
 - Portion in 14px secondary: "1 wrap + 1 cigar cup"
 - Small "Swap" pill (cobalt outline) bottom-right

Use these exact meals:

- BREAKFAST — Moin Moin + Pap (high-res photo) — safe for both
- LUNCH — Brown Rice & Garden Egg Stew — safe for both
- DINNER — Okra Soup + Small Eba — small amber dot "Half portion (diabetes)"

5. "Tip of the day" card: white surface, Marigold (#E8A92E) 4px left border, small 💡 icon in Marigold:

"Did you know? Plantain is high in potassium — great for blood pressure, but watch portions if you have kidney concerns."
6. "Quick actions" row: 2 large square cards side by side, white surface, navy duotone icons:
 - 📷 Scan a meal
 - 🛒 My grocery list

7. Bottom navigation: white with subtle top border. 5 slots:

Home (active — Navy icon, cobalt dot underneath), Plan, [raised center Scan button — Blueberry Cobalt circle with Marigold thin ring, white camera icon], Caregivers, Profile

Show the screen at 390×844. Every food photo MUST be high-resolution editorial-quality. No stock-y feel.

Prompt 4 — Meal Plan (week view + meal detail)

Build TWO connected screens for the meal plan feature. Lapyra design system from Prompt 0.

SCREEN A — WEEK VIEW

- Top bar: back arrow (Navy), title "Your Week" in Sora 700, filter icon right
- Day selector strip horizontally scrollable: Mon-Sun. Today highlighted with a Cobalt pill, white text. Other days have small date numbers below in secondary text.
- For the selected day, show 4 stacked meal cards (Breakfast, Lunch, Dinner, Snack):
 - Time + meal type label top in uppercase Cobalt 12px
 - HIGH-RESOLUTION food photo on right (square, 96px, 16px radius)
 - Dish name + local name in parens in Sora 700, 17px
 - Safety dot row (small colored dots, not blocks)
 - Portion in local measure, 14px secondary
 - Tap target whole card
- Floating action button bottom-right: "⚡ Regenerate week" in Marigold background with Navy text, 28px radius, soft Navy shadow

SCREEN B — MEAL DETAIL (opens as a full-screen sheet, slide-up)

- Hero: large HIGH-RESOLUTION food photo, 320px tall, edge-to-edge, with a Navy gradient overlay at the very top for the back arrow legibility
- Below photo, on warm white surface with 28px top radius overlapping the photo:
 - Dish name in Fraunces 600, 28px, Navy
 - Local language name in Sora 500, 16px, secondary
 - 3 stat pills horizontally in Periwinkle backgrounds: Calories (320 kcal), Carbs (45g), Sodium (210mg) — each with Navy number,

secondary label

- Tab strip in Cobalt underline style: "Why this meal" | "Ingredients" | "How to cook"
- Tab 1 expanded by default:
 - "This meal is balanced for both your conditions:
 - Low glycemic load (good for diabetes)
 - Low sodium — no maggi cube used
 - Moderate potassium — fine for blood pressure, watch if kidney diagnosed"
 - Each line has a small sage/amber dot indicator, not a colored block.
- Bottom action bar (sticky, white with top border):
 - "Swap this meal" (secondary cobalt outline) | "I ate this" (primary Cobalt)

Show both screens side by side, with an arrow showing tap → detail. ALL imagery high-resolution editorial food photography.

Prompt 5 — Food Scanner flow (3 screens)

Build the FOOD SCANNER feature — 3 connected screens. Lapy design system from Prompt 0.

SCREEN A — SCAN CAMERA

- Full-screen background: deep Blueberry Navy (#1E2A5E)
- Live camera viewfinder area (placeholder showing a high-res Nigerian dish in the frame for demo)
- Center: square framing reticle in white, slightly rounded corners, with 4 corner brackets in Marigold
- Bottom: large circular white capture button (88px) with Cobalt inner ring
- Top-left: close X button in white
- Top-right: gallery icon (upload existing photo) in white
- Bottom helper text in Periwinkle: "Point at your meal. Works best with full plate in frame."

SCREEN B — ANALYZING

- Same Navy background with subtle blueberry pattern in low-opacity
- Center: spinning AI shimmer animation in Cobalt + Marigold dual ring
- Captured photo shown in a small 80px circular thumbnail at center
- Text in Fraunces 28px, Butter Yellow: "Lapy is reading your plate..."
- Three rotating helper lines below in Periwinkle 14px:
 - "Identifying ingredients..."

"Checking your conditions..."

"Calculating portions..."

SCREEN C — RESULT

- Top: captured HIGH-RESOLUTION photo (1:1, 320px), with small overlay badge top-right "94% sure" in Marigold pill
- Below on warm white surface, 28px top radius:
 - "We see..." small Cobalt uppercase label
 - Dish name big in Fraunces 600, 28px: "Jollof Rice + Fried Plantain"
 - Two alternative guesses as small Periwinkle chips: "Concoction rice?", "Coconut rice?"
- Nutrition grid (4 stat cards in 2x2 grid), each Periwinkle background, 20px radius:
 - 580 kcal
 - 78g carbs
 - 420mg sodium
 - 380mg potassium
- Safety cards for each active condition, white surface with subtle left-border accent:
 - Type 2 Diabetes — sage dot — "Eat half portion for safe glucose."
 - High Blood Pressure — amber dot — "Sodium higher than ideal — pair with water and skip salt-rich snacks today."(Dots are small, not big colored blocks — brand stays calm)
- Two buttons: "Log this meal" (primary Cobalt) | "Scan again" (secondary)
- Tiny source line bottom, 11px secondary: "Nutrition data from West African Food Composition Table"

Show all 3 screens in flow. ALL imagery high-resolution.

Prompt 6 — Grocery List screen

Build the GROCERY LIST screen. Lapya design system from Prompt 0.

- Top bar: back arrow, title "Grocery List — This Week" in Sora 700, share icon right
- Subheader hero card: Blueberry Navy background, 20px radius, 20px padding
 -  "23 items" Sora 700 22px Butter Yellow
 - "Estimated ₦18,500" Inter 500 16px Periwinkle
 - Small "Recalculate" link Marigold right
- Grouped by category (collapsible sections), section headers in Sora 700

Navy with a chevron:

- PROTEINS (5) — Mackerel (2 medium), Beans (1 mudu), Eggs (12)...
 - GRAINS & STARCHES (4)
 - VEGETABLES (8)
 - FRUITS (3) — include "Blueberries (1 small punnet)" as a nod to brand
 - COOKING ESSENTIALS (3)
- Each item row: circular checkbox left (Cobalt when checked with white check), item name in 16px Navy, quantity in 14px secondary, small price estimate in Navy bold right
 - Checked items: strikethrough + secondary color, checkbox filled Cobalt
 - Sticky bottom button: "Share with my shopper" primary Cobalt — opens WhatsApp share sheet on tap
 - Below button, 11px secondary: "Prices estimated from Lagos markets, May 2026"

Section headers in primary Navy with a Cobalt chevron arrow.

Prompt 7 — Caregiver Invite + Caregiver View (3 screens)

Build the CAREGIVER feature — 3 screens. Lapy design system from Prompt 0.

SCREEN A — INVITE CAREGIVER (modal sheet from Profile)

- Sheet slides from bottom, rounded top corners 28px, warm white surface
- Hero illustration at top (300px tall): two phones connected by a soft Cobalt arc with a small Marigold heart in the middle, on a Periwinkle background panel
- Headline Fraunces 600, 28px, Navy: "Bring someone into your care circle"
- Body Inter 400 16px secondary: "Invite a loved one to see your meal plan and help you eat well."
- Phone number input field with country flag prefix ( +234), Cobalt focus state
- Relationship dropdown: Daughter / Son / Spouse / Friend / Other
- Primary button (full-width Cobalt): "Send invite by SMS"
- Below: "Or share a link" with a tappable WhatsApp icon

SCREEN B — CAREGIVER HOME (logged in as Bola, viewing Mama)

- Top bar: shows Mama's HIGH-RESOLUTION circular avatar (real dignified photo of a 50s Nigerian woman) + "Caring for Mama Nkechi" in Sora 700 + small dropdown chevron to switch between people she cares for
- Status card with Marigold left-border accent, white surface:

"Mama logged 5 of 7 meals this week" with a small smiling-face icon in Marigold

- Today's meals (read-only version of patient home, no swap button) — 3 food cards horizontally scroll, HIGH-RESOLUTION photos
- Action card with Periwinkle tint:
"Mama hasn't logged dinner yet. Send a check-in?" with a "Send a message" button (Cobalt primary) — opens prefilled WhatsApp message
- "This week's grocery list" preview card with "View full list →" link in Cobalt
- Different bottom nav: Home, Mama's Plan, Grocery, Chat, Profile

SCREEN C — CARE CIRCLE settings

- List of linked people. Each row: HIGH-RESOLUTION circular photo, name in Sora 600, role badge in small Periwinkle pill (Patient / Caregiver / Dietitian)
- Each row has a "Manage" link right in Cobalt
- "+ Add someone" button at the bottom — Cobalt outline pill

Show all 3 screens in flow.

Prompt 8 — Dietitian View (2 screens)

Build the DIETITIAN dashboard — 2 screens. Lapa design system from Prompt 0.

SCREEN A — DIETITIAN HOME (Dr. Adaobi logged in)

- Top bar: warm white. "Dr. Adaobi" greeting in Sora 700 + small notification badge in Marigold
- Stats hero row, 3 cards, each Periwinkle background, 20px radius, big Navy numbers and small secondary labels:
 - "24" Active patients
 - "168k" This month
 - "8" Plans to review
- "Patients needing attention" section header in Sora 700 Navy
- List of patient cards, each white surface with:
 - HIGH-RESOLUTION circular photo + name in Sora 600 Navy
 - Conditions chips (small Periwinkle pills): D, H, CKD
 - Status indicator using small dot + plain text — clay dot "Hasn't logged in 3 days" / amber dot "Glucose trending high" / sage dot "On track"
- "Review →" link Cobalt right

- Floating action button bottom-right: "+ Add patient" in Marigold with Navy text, soft Navy shadow

SCREEN B — PATIENT DETAIL & EDIT PLAN

- Top: patient header card with HIGH-RESOLUTION circular photo, name in Fraunces 24px Navy, conditions chips, age, "Last login: 2 days ago"
- Tab strip in Cobalt underline style: "Plan" | "Logs" | "Notes" | "Messages"
- Plan tab shown: same week view as the patient sees, BUT each meal has an "Edit" pencil icon (Cobalt) on top-right of card
- When meal tapped, an inline editor opens (Periwinkle tint background) letting Dr. Adaobi swap dish, change portion, add a note
- Edited meals show a small badge Marigold pill: "Edited by Dr. Adaobi"
- Sticky bottom: "Send plan to Mama Nkechi" primary Cobalt button

Show both screens with arrows. ALL imagery high-resolution.

Prompt 9 — Upgrade / Paywall screen

Build the UPGRADE PAYWALL screen (triggered when free user hits scan limit). Lapy design system from Prompt 0.

- Background: warm white with a subtle high-resolution blueberry photograph motif at the very top (300px), with a Navy gradient fading down for text legibility
- Top: close X button left in white over photo
- Headline over photo in Fraunces 600 32px Butter Yellow: "You've used your 5 free scans for May"
- Subhead in Periwinkle 16px: "Go unlimited and bring your whole family."
- 3 price tier cards (vertical stack), warm white surface, 20px radius. The middle one is highlighted as "RECOMMENDED" with Marigold border 2px, Marigold "RECOMMENDED" pill badge at top, and slight 1.02x scale:
 - LAPYA FREE — ₦0 — 3 meal plans / 5 scans — current plan (greyed out, no button)
 - LAPYA CARE — ₦1,500/month — Unlimited everything for one person · 1 caregiver included · primary Cobalt button "Choose Care"
 - LAPYA FAMILY — ₦3,500/month — Up to 4 people · 3 caregivers · Monthly dietitian Q&A · primary Cobalt button "Choose Family"
- Below: "What you get" 3-row comparison checklist with small Cobalt checks and grey dashes
- Bottom microcopy 12px secondary: "Cancel anytime · Paystack secure"

billing"

- Tiny: "Powered by your monthly subscription — no ads, ever."

Style with warm trust feel, not aggressive pressure. The blueberry hero photo MUST be high-resolution editorial — bowl of fresh blueberries on light wood, golden hour, overhead.

Prompt 10 — Profile + Settings

Build the PROFILE screen and the SETTINGS screen. Lapy design system from Prompt 0.

PROFILE screen:

- Top: small back arrow on warm white
- HIGH-RESOLUTION circular avatar centered top, 112px, with a small Cobalt pencil edit icon overlay bottom-right
- Name in Fraunces 600 24px Navy centered
- Role chip below: Periwinkle pill "Patient · Lapy Care subscriber"
- Stats row, 3 cards Periwinkle background:
 - 🔥 12-day streak
 - 47 meals logged
 - 8 scans this month
- Big list items (white surface, dividers, each with duotone Navy icon + label + Cobalt chevron right):
 - My conditions
 - My food preferences
 - Care circle (3 connected) →
 - My subscription — Lapy Care · ₦1,500/mo
 - Book a dietitian (with small Marigold star badge)
 - Help & FAQ
 - Settings →
 - Sign out (clay-red text, no chevron)

SETTINGS screen:

- Top bar with back arrow + "Settings" title
- Account section header (Sora 700 14px uppercase Navy): Phone, Email, Language (Eng / Pidgin / Hausa / Yoruba / Igbo dropdown)
- Notifications section: toggles (Cobalt active) for Meal reminders, Tip of the day, Caregiver alerts, Marketing
- Privacy section: Download my data, Delete my account (clay-red link)

- About: Version, Terms, Privacy Policy

Make settings list items clean, with section headers in 14px uppercase secondary, dividers between items, plenty of breathing room.

Prompt 11 — Pitch & demo polish (run last)

Now polish the prototype for a demo video and judging. Lapy design system from Prompt 0. Maintain blueberry-led palette throughout.

1. Generate 3 EMPTY STATE designs, each with custom illustration in Periwinkle + Navy + Marigold:
 - No meal plan yet: friendly illustration of empty plate + "Let's build your first plan" CTA in Cobalt
 - No scans yet: illustration of camera with sparkles + "Try scanning your lunch today"
 - No caregivers yet: illustration of two hearts connecting + "Bring someone into your circle"
2. Generate 3 LOADING / SKELETON states for: Home meal cards, Scan analyzing, Grocery list calculating. Use Periwinkle shimmer animation on white surfaces.
3. Generate a SUCCESS TOAST and an ERROR TOAST in the brand style:
 - Success: small sage check + white text on Navy background pill, bottom of screen, auto-dismiss 3s
 - Error: small clay icon + white text on Navy background pill(Toasts always Navy bg with colored icon — never full-red or full-green pills, that breaks our calm palette)
4. Generate the APP ICON in 3 variants for the PWA install prompt and pitch deck:
 - Light bg (warm white) with Navy + Marigold blueberry mark
 - Dark bg (Navy) with Butter Yellow + Periwinkle mark
 - Monochrome Navy for faviconAll icons rendered at 1024px source, with rounded-square iOS-style container.
5. Generate a single LANDING/MARKETING PAGE (mobile + desktop) for lapy.app:

- Hero: HIGH-RESOLUTION editorial photo of African woman and daughter at table, Navy gradient overlay, big Fraunces headline in Butter Yellow + Cobalt CTA
- 3-feature row with icons in Periwinkle circles
- Social proof spot: "Trusted by Nigerian dietitians at LUTH and UCH" with logos placeholder
- Pricing teaser pointing to in-app paywall
- Footer in Blueberry Navy with Butter Yellow links
- A subtle blueberry photograph echo somewhere on the page

6. Generate ROLE-SWITCHER UI (a dropdown in the profile area that lets a user switch between Patient / Caregiver / Dietitian view) — important for demo video to show all 3 personas from one account. Style as a white sheet with 3 large tap targets, each with avatar + role label + Cobalt check on the active role.

Provide all of these in one artboard labelled "Demo Polish Kit". EVERY photograph must be high-resolution editorial quality.

Bonus Prompt — Connect everything into a clickable prototype

Now wire all the screens together with interactions. Maintain the Lapya design system at every transition.

PRIMARY FLOWS to make clickable end-to-end:

Flow 1 — First-time patient onboarding:

Splash → Welcome → Onboarding 1-4 → Home → tap Plan → Week view → tap a meal → Meal detail → tap Swap → return to plan

Flow 2 — Scanner:

Home → tap center Scan button → Camera → tap capture → Analyzing → Result → tap "Log this meal" → return to Home with Navy toast "Meal logged ✓"

Flow 3 — Caregiver invite:

Profile → tap Care circle → Invite sheet → enter phone → tap Send → Navy toast "Invite sent to +234..."

Flow 4 — Role switching (demo flow):

Profile → role dropdown → switch to Caregiver → Caregiver home loads →
back to dropdown → switch to Dietitian → Dietitian home loads

Flow 5 — Hit payroll:

Scanner result (6th scan in a month) → Paywall screen → tap Choose Care →
mock checkout → Navy toast "You're now on Lapya Care 🧡"

TRANSITIONS:

- Sheets: slide-up with soft easing
- Tab switches: fade with Cobalt underline animation
- Buttons: 0.96x scale on press, soft Navy-tinted shadow lift
- Page-to-page: subtle right-to-left slide

Confirm every screen renders at 2x and every food/people photograph is
high-resolution editorial quality.

✅ Order of operations checklist

1. ☐ Prompt 0 (Master Setup with blueberry palette + logo brief)
 2. ☐ Prompt 1 (Splash + Welcome)
 3. ☐ Prompt 2 (Onboarding)
 4. ☐ Prompt 3 (Home)
 5. ☐ Prompt 4 (Meal Plan + Detail)
 6. ☐ Prompt 5 (Scanner flow)
 7. ☐ Prompt 6 (Grocery list)
 8. ☐ Prompt 7 (Caregiver)
 9. ☐ Prompt 8 (Dietitian)
 10. ☐ Prompt 9 (Paywall)
 11. ☐ Prompt 10 (Profile + Settings)
 12. ☐ Prompt 11 (Polish kit)
 13. ☐ Bonus prompt — Wire interactions
-

🎯 Power tips for Figma Make AI

- **Iterate one screen at a time.** Don't ask for 5 screens in one prompt — you'll get generic results. Each prompt above is scoped to a single feature.
- **Reference the master prompt.** If a screen drifts from the brand, prepend: *"Remember the Lapy design system from Prompt 0 — blueberry palette, Navy #1E2A5E, Cobalt #3D6BE5, Marigold #E8A92E accent only..."*
- **Ask for variants.** After any screen, say *"Show me 2 alternative layouts of this screen keeping the blueberry palette."*
- **Reject blurry images.** If any image comes back below editorial quality, say: *"Replace this image with a higher-resolution professional food photograph — 1500px source minimum, top-down, natural light, no AI artifacts."*
- **Use real content.** Always include actual Nigerian dish names, real conditions, real prices — never lorem ipsum. Judges spot fake content instantly.
- **Logo iteration.** If the LP-in-blueberry logo from Prompt 0 doesn't land in the first try, say: *"Generate 3 more variants. Make the L the leaf/stem and the P the round berry body. Or interlock the two letters into the silhouette."*
- **Save versions.** Duplicate the file before big changes — Figma Make can overwrite work.
- **Export for pitch video.** Once happy, export each screen as PNG at 2x or 3x for your Technovation Technical Video.

🎨 Quick reference — Blueberry palette card

Role	Name	Hex	Where it shows up
Hero / Headers	Blueberry Navy	#1E2A5E	Top bars, splash, hero cards, toasts
Primary action	Blueberry Cobalt	#3D6BE5	Buttons, links, active states
Soft surface	Periwinkle	#A8BCF0	Selected card tints, stat cards

Accent	Marigold	#E8A92E	Streak, "RECOMMENDED" badge, 1 hero CTA
Soft accent	Butter Yellow	#F4D27A	Display text on Navy, hover states
Canvas	Warm White	#FBFAF7	Background
Cards	White	#FFFFFF	Surfaces
Text on light	Navy 900	#1A2244	Body text
Text on dark	Cream	#F4F1EA	Text over Navy
Subtle success	Sage	#6E9A6E	Small dots, never blocks
Subtle warning	Muted amber	#C9892E	Small dots only
Subtle danger	Clay	#B4533A	Small dots only
